

The foundation of the Cardpointe platform — securing every transaction at the point of interaction through data breach protection and PCI scope reduction.

Protecting transactions, eliminating PCI headaches

Unrivaled Payment Security

Cardpointe’s industry-leading, PCI-certified P2P2 solution protects each client transaction, while reducing PCI compliance scope.

PCI-Certified P2PE

Ultimate Protection

The only solution for full data breach protection. Cardpointe instantly encrypts cardholder data for swiped, dipped and keyed transactions at the point of interaction, sanitizing your system of sensitive information and removing your organization from the scope of PCI.

Maximum PCI Scope Reduction

Reduce your SAQ to 26 questions, with the potential to eliminate the SAQ entirely.

PCI-Certified Vault

Store secure profile records for each of your customers in a 100% PCI compliant environment.
